

Dear Parents/Guardians and Staff:

Earlier this week, our Plainville families were informed that an individual was in the early steps of being tested for Covid-19. While the message indicated there has been a presumptive positive diagnosis there had been no confirmed test results at that time. We truly appreciate this individual working collaboratively with us and updating us throughout the testing process.

As a result, we proactively cleaned our schools and followed CDC guidelines in the best interest of our students and families.

Today, I am calling with an update: The test results for this individual have been confirmed negative. Again, we appreciate how collaboratively this individual has worked with us in the best interest of the community.

As we all know, we want to continue with preventative measures including washing hands, staying home when sick, covering coughs and maintaining healthy habits. Please review the district website, as there is important information you may find helpful.

I appreciate everyone working together and remaining calm and focused as we go forward.

Sincerely,

David P. Raiche, Superintendent of Schools
