

# Environmental Print Book

Environmental print is the print we see all around us - the print on commercial signs, labels and products we use everyday, etc (Cheerios, McDonald's, Target, Kleenex, stop signs, lego etc). Having environmental print accessible helps children feel successful; they are “reading” at an early age. These early successes motivate young children to read more and more!

Help children make a book of environmental print. Books can be stapled, bound, tied with yarn, or bound however you would like.

The book must include:

1. A cover. \_\_\_\_\_’s Environmental Print Book.  
Children will write his/her name on the line.
2. 5 pages with environmental print. Children may cut out and make it as a collage or it can be 1 environmental print per page. Have Fun!
